

ultimate light control

ROLLER BLOCKOUT SYSTEM

Louvolite's blackout framing system has been designed to block out light to satisfy the practical needs of most commercial installations.

Ideal for use in hospitals, schools, offices, hotels, conference rooms and bedrooms. Blockout blinds are cost effective and an easy to install solution that can be manually operated or motorised using the Louvolite One Touch® Mains Powered AC Motor. Motorisation is convenient and has the added benefit of child safety.

Operated with Louvolite's market leading roller blind systems - System 32®, System 32®/40® Hybrid and System 40®/45® closed cassettes for effortless operation.

The sleek design with minimum window obstruction means the roller blockout system is the perfect choice for rooms in which light control is essential.
