DESIGN

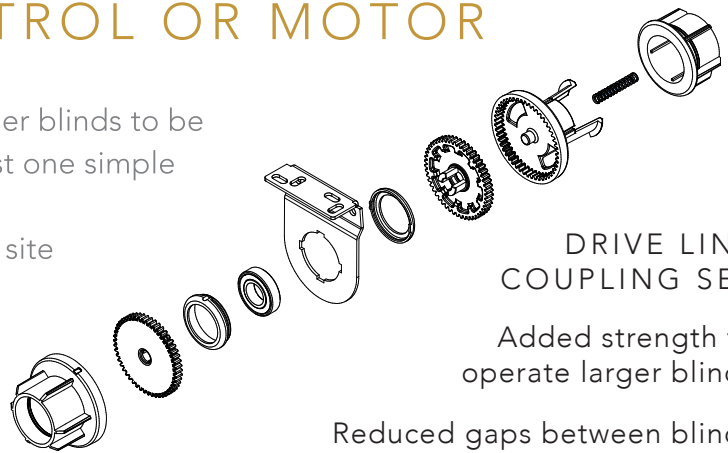

WITH OUR DRIVE LINK COUPLING SET

Operate multiple roller blinds with JUST ONE SIDE CONTROL OR MOTOR

Louvolite's New Drive Link allows multiple roller blinds to be joined together with a single control. With just one simple action the blinds can be raised or lowered simultaneously and can be easily adjusted on site to ensure perfect blind alignment.

If the blinds are to be motorised the Drive Link is especially cost effective as only one motor is required to lift multiple blinds.

DRIVE LINK
COUPLING SET

Added strength to
operate larger blinds

Reduced gaps between blinds

For System 40®, 45® & 55®
